KINDERGARTEN (PRE-SCHOOL)

PRE-READING READINESS DEVELOPMENT

(Pre-school level)

There are several avenues by which children and adults can learn to read or increase their reading ability. Conclusive studies demonstrate that in order to read better and understanding faster it is important to use phonics.

Kindergarten with Ace and Christi This kindergarten program is designed for children tested "not ready to learn to read." It features a complete scope and sequence of concepts and skills needed to prepare K3-KS children in readiness to learn to read combined with a teacher's 4 volume daily self instructional manual. Sixty PACEs, for the five subjects to provide practice in all developmental skills necessary for learning to read. They are filled with Bible and animal pictures to correlate stories to letter sounds, coordination development activities to evaluate coordination skills, and full-colour picture stories motivate a child to read. They will also learn social skills, the wonders of God's world, and the reality of God's love. Within 12 to 16 weeks a child becomes acquainted with phonics and encourage motor coordination skills by using the song CD, word relationships and character development.
