

# Word Building - American Spelling Words

A.C.E. resources originate in the U.S.A. Many national PACEs have been produced in Australia, so that history and geography are more relevant, and also Maths measurements and currency are those in use in countries such as Australia, New Zealand, and other South Pacific countries.

Word Building and English teach pronunciation and spelling. As American resources, they can often contradict Australian or British pronunciation and spelling.

First of all, it would be good to remember that children are going to encounter “Americanisms” in so many areas, such as the Internet and media. The opportunity is there to present both spellings and show a preference for one, while teaching that other correct spellings may exist.

If you want to present British (Australian) spellings to your child, the table below shows which Word Building PACEs include words that can be discussed.

PACE	American	British (Australian)
1028	gray	grey
1034	center honor	centre honour
1036	airplane	aeroplane
1038	tire	tyre
